

Ideation Phase

Brainstorming Ideas

Date	03 October 2026
Team ID	SWTID-2026-4647
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Brainstorming Ideas:

1. Automate ticket classification using Flow Designer.
2. Create custom table to store structured ticket records.
3. Implement dependent choice logic between Category and Subcategory.
4. Trigger automation when Category is empty.
5. Use keywords in Short Description to auto-assign Category/Subcategory.
6. Send automated email notifications to callers.

Prioritization:

- **High Priority:** Auto-classification flow, dependency logic, email notifications.
- **Medium Priority:** Custom table creation, field configuration.
- **Low Priority:** UI enhancements, advanced reporting.
