

Ideation Phase

Define the Problem Statements

Date	03 October 2026
Team ID	SWTID-2026-4647
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	4 Marks

Problem Statement:

In an Educational Institute raising Tickets regarding IT is complex due to the process in between raising tickets and solution, the main problem is classifying the category of the problem and to manually assign professional employees to solve the problem.

Idea:

The solution proposed by our team is to create an auto ticket classifier to automatically classify the raised tickets based on the keywords specified in the short description provided in the ticket.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel	Solution
PS-1	A teacher	Deliver lessons smoothly	Classroom tech often fails	IT tickets take too long to process	Stressed and delayed	Automatic Ticket classification based on the keyword provided in the description
PS-2	An IT staff member	Handle multiple requests quickly	Manual classification slows me down	The process is repetitive and error-prone	Exhausted and inefficient
