

Ideation Phase

Empathize & Discover

Date	03 October 2026
Team ID	SWTID-2026-4647
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map helps visualize what users say, think, feel, and do. It allows teams to step into the shoes of their customers and design solutions that truly address their frustrations and goals.

Example: School IT Helpdesk Automation

****User: Student/Teacher****

- ****Says:**** “My laptop is slow”, “Wi-Fi keeps disconnecting.”
- ****Thinks:**** “I need this fixed before class.”
- ****Feels:**** Annoyed when delays affect productivity.
- ****Does:**** Submits tickets with minimal details, expects quick fixes.

****User: IT Helpdesk Agent****

- ****Says:**** “I must categorize tickets before resolving.”
- ****Thinks:**** “Automation could save me time.”
- ****Feels:**** Frustrated by repetitive manual work.
- ****Does:**** Reviews each ticket, assigns categories, and informs users manually.
